-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Jouillat (6,264,065). Jouillat discloses, in fig. 1, a fluid dispenser comprising a gas reservoir (12) defining an actuating wall for causing the volume of the reservoir to vary, and thereby driving the gas out of said reservoir; a fluid reservoir (13) defining an actuating wall for causing the volume of the reservoir to vary and thereby driving the fluid out of said reservoir; an outlet orifice (19) common to the gas reservoir (12) and to a fluid reservoir (13); a gas feed duct (14) which connects the gas reservoir (12) to the common outlet orifice (19); and at least one fluid feed channel (15) which connects a fluid reservoir (13) to the common outlet orifice (19); and an outlet chamber 18 having a porous material 17. The fluid dispenser comprises two sheets: one sheet is deformable and the other sheet is plane.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jouillat in view of Holzner (4,534,509).

Holzner teaches an initial closing-off means 8 for interrupting a communication between a fluid reservoir 6 and an outlet orifice via a channel.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide in the Jouillat invention with an initial closing-off means for interrupting an communication between a fluid reservoir 13 and an outlet orifice via a channel 15, in view teaching of Holzner, in order to prevent leakage of the fluid before its dispensing.

5. Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jouillat in view of De Pous et al. (5,950,817).

De Pous et al. teach, in fig. 2, a fluid dispenser comprising a gas reservoir 13 for actuating the dispensing of a mixed fluid from two fluid reservoirs 74.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the fluid dispenser of Jouillat with a gas reservoir for actuating the dispensing of a mixed fluid from two fluid reservoirs, in view teaching of De Pous et al., in order to dispense a mixed fluid from two different fluids.
